Khaled Mahmoud Helaly

MERN Stack Developer | Software Engineer

helalykhaled3@gmail.com | (+20) 127 653 9981 | Alexandria, Egypt | GitHub | LinkedIn | Behance

SOFTWARE ENGINEERING PROFILE

Full Stack Developer specializing in the MERN stack, focused on building responsive, production-ready web applications with clean, reusable component architecture. Experienced in designing RESTful APIs, implementing JWT-based authentication, and integrating third-party services such as Stripe payments, Redis caching, and AI-based recommendation systems. Strong emphasis on clean code, usability, and scalable, maintainable systems.

PROJECTS

E-Commerce Web Application *Independent Project*

- Building this application independently, with a professional focus on UI quality, UX, responsive design, and reusable React component architecture.
- Applying modern MERN-oriented development practices with an emphasis on usability, maintainability, API integration, and scalable structure.

CircleUp — AI-Powered Event Discovery & Community Platform

- Built a full-stack platform as a graduation project, using React.js, Node.js, Express.js, and MongoDB to recommend events based on user interests, hobbies, city, and level.
- Implemented authentication, REST APIs, and database models alongside admin flows, RSVP, ticketing, and code-based check-in.
- Integrated AI-based recommendations (Python, FastAPI, Scikit-learn), Redis caching, Stripe payments, Cloudinary media uploads, and Resend email notifications.

Quran Memorization Academy Platform

- Developed this real-world solution independently for a Quran memorization academy, translating practical requirements into responsive, user-focused interfaces and functional features.

E-Commerce Web Application *SEF Academy — Team Project*

- Collaborated with a development team during SEF Academy training to build this application, contributing React-based frontend implementation, responsive UI, integration, and feature development.

Hospital Booking System *Team Project*

- Implemented responsive appointment booking pages and reusable React.js components for a team-based hospital booking web application.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Redux Toolkit, Responsive Design

Backend: Node.js, Express.js, REST APIs, MVC Architecture, Middleware

Database: MongoDB, Mongoose, SQL, MySQL, Database Design, CRUD Operations

Authentication & Security: JWT Authentication

Tools & Platforms: Git, GitHub, Postman, VS Code, npm, API Integration

UI/UX: Figma, UI/UX Design, Wireframing, Prototyping, Responsive User Interfaces

CERTIFICATIONS & TRAINING

- Back-End Web Development Diploma — SEF Academy (Node.js, Express.js, MongoDB, Mongoose, JWT, MVC, REST APIs, CRUD Operations)
- Front-End Web Development Diploma — SEF Academy (React.js, JavaScript, HTML5, CSS3)
- Web Development Track — Digital Egypt Pioneers Initiative (DEPI), Ongoing
- UI/UX Design Course — Information Technology Institute (ITI)
- Node.js Back-End Development — Udemy (Jonas)
- Node.js — Mahara Tech
- Full Stack Web Development, PHP Track — National Telecommunication Institute (NTI)

EDUCATION

B.Sc. in Information Technology — Faculty of Computers and Information, Suez University (Expected 2026)
